

Jacob Yongue

SOFTWARE ENGINEER · ENTERPRISE BUSINESS APPLICATIONS · INTEGRATIONS · REGULATORY COMPLIANCE · AI SOLUTIONS

Clemson, SC | jacobyongue@outlook.com | linkedin.com/in/jacob-yongue | wizardgang.ai

SUMMARY

Software engineer with 6+ years delivering enterprise applications across complex, regulated environments. Led technical delivery across 20+ implementations, large distributed development/support teams, and zero-disruption migrations while maintaining 5-star CSAT. Experienced translating operational requirements into reliable production systems across supply chain, government, and higher-education environments subject to CJIS, FERPA, and HIPAA controls.

CORE SKILLS

Development & Data C#/.NET · Python · SQL/T-SQL · SQL Server · SSRS/BI reporting · ETL/data pipelines

Systems & Integrations REST/JSON APIs · OAuth 2.0 · SAML/SSO · SOAP · EDI · interface & data mapping

DevOps & Operations Git/GitHub · CI/CD · PowerShell · monitoring & logging · incident response · production support

Delivery & Support Jira · QA/UAT · regression testing · upgrades, migrations & cutovers · technical documentation · end-user training

PROFESSIONAL EXPERIENCE

Consultant / Technical Lead Oct 2024 – Apr 2026

Supply Chain Technologies LLC · Mauldin, SC

- Led 20+ distributed developers and technical delivery across **20+ enterprise implementations** — requirements, integration design, testing, UAT, deployment, troubleshooting, and production support.
- Owned **Git/GitHub release delivery** for the software portfolio — branching strategy, release cadence, deployment, and postrelease monitoring.
- Designed and supported **RESTful API and EDI data-exchange integrations** connecting CIMS WMS to 3PL, ERP, and carrier platforms across order, inventory, audit, import/export, and shipping workflows.
- Engineered **multisystem integrations across ERPs, WMS, and third-party platforms**, including a post-acquisition integration spanning NetSuite, CIMS WMS, and Sage ERP delivered with a zero-disruption cutover.
- Built monitoring, logging, and data audit reporting across integrated systems, surfacing and resolving \$10M+ in inventory and financial variances.

Lead Developer Nov 2023 – Sep 2024

Spartan Technology Solutions · Spartanburg, SC

- Led **8 .NET developers and 12 support staff** delivering multi-state case-management applications; owned CI/CD, release cadence, production stability, and escalated technical troubleshooting.
- Led business workflow analysis and current/future-state documentation for a **\$1–5M Florida State Attorney** case-management implementation, governing historical data migration and QA/UAT under CJIS controls.
- Built and maintained **SQL queries, stored procedures, and SSRS reports** supporting case-management operations and compliance reporting for multi-state agency users.

Senior Software Engineer Jul 2019 – May 2023

Fastfetch Corporation · Seneca, SC

- Owned end-to-end development and **support** for C#/.NET **order fulfillment solutions**, plus high-volume **ETL/data pipelines**.
- Led **zero-downtime migrations** across order fulfillment platforms — impact analysis, testing, and post-deployment hypercare.
- Designed and integrated WMS-connected applications across **12+ North American locations** (US, Canada, Mexico).
- Produced technical specifications, test cases, runbooks, and **end-user training materials** across customer implementations.

EDUCATION & CERTIFICATION

Clemson University — Bachelor of Arts, Computer Science · **2018**

PMP, Project Management Institute — application approved, exam pending · **2026**

PMI continuing education: Disciplined Agile · Scrum · Value Stream Management

SOFTWARE PROJECTS

WizardGang — Software Engineering Portfolio wizardgang.ai

- Built and operate the production stack — **React, TypeScript, Node.js, REST APIs, WebSockets, auth/session management** — with monitoring, troubleshooting, and production-support ownership.
- Publish live operational evidence: uptime, incidents, deployments, and ISO/IEC 27001 & 42001 conformance mappings.
